Profile Summary

Solution-driven front end developer who is passionate about programming, learning and web development. Dependable hard working individual looking for growth opportunities to improve my technical skills and knowledge in a team-based environment.

Skills

Development & Workflow	Front-End	Other / Familiar With
- Git & Github	- Javascript	- Java
- Postman	- React	- Bootstrap
- Heroku	- Redux	
- VSCode	- Typescript	
- NPM	- HTML/CSS/SASS	

Projects / Experience

- **Where To Watch** | *React, Redux, APIs, React Router, Functional Components, HTML, CSS*
  - Developed, designed, and deployed a React/Redux web application to make movie/show searching a more interactive experience.
  - Implemented multiple external APIs to retrieve data related to user's searches on motion pictures and redesigned the data to serve to the users in an appealing manner.
  - Curated web app to make user experience delightful and simple to navigate.
- **Dad Joke Tier List** | *Javascript, HTML, CSS, APIs*
  - Built a fun web app for those who enjoy a good dad joke and want to judge the jokes their humor is competing with.
  - Developed the app from start to finish to showcase fundamental understanding of HTML, CSS, and Vanilla Javascript. (No Frameworks)
  - Established various features such as a joke generator and a "Create Your Own Joke" form that makes the web app have a lively UI/UX design.
- **Portfolio** | *Javascript, HTML, CSS*
  - Pioneered and spearheaded the development of my own professional portfolio in order to introduce myself and demonstrate proficient understanding of skills.
  - Engineered the entire web app in a simplistic manner to draw users to continue to learn more about my journey and view more projects that were developed from the ground up.
  - Designed portfolio to allow employers to find contact info and more projects easily.

Education

- **Online Bootcamps**
  - The Complete Web Developer Bootcamp
  - Modern React With Redux
  - Mastering Typescript
